

EVA SELF ADHESIVE

Design it, draw it, cut it, stick it. Soft & flexible sheets of foam with a self adhesive backing in a range of bright colours & glitter colours. Cut out simple shapes or letters to create colourful pictures & designs, from something simple to more complex for older students & artists.

EV01

Create FLOWER, FISH, 3D STAR

You will need:

- Five Star EVA Self Adhesive Foam Standard & Glitter Colours
- Five Star Star Tempera Blue
- Five Star Stubbie Brush R2
- Scissors
- Pencil
- Card/paper

Method - Flower:

Step 1: Draw (or trace) a small flower onto the EVA backing paper & cut this out.

Step 2: Place the cut out flower onto the backing of the next EVA colour & draw a larger flower around it, then cut it out.

Step 3: Using the larger flower repeat Step 2.

Step 4: To assemble remove the backing paper from the second largest flower & stick onto the largest flower ensuring the petals line up.

Step 5: Repeat Step 4 to add the next layer & centre circle

Step 6: You can then stick the flower to any surface by removing the backing.

Method - Fish:

Step 1: Paint 'the sea' on a piece of paper using Star Tempera Blue & leave aside to dry.

Step 2: Select a picture of a fish & draw (or trace) the outline of the different parts ie body, tail, fins, stripes & eyes onto the backing of different coloured EVA Self Adhesive Foam.

Step 3: Cut out the shapes.

Step 4: Remove the backing of the fish body & stick on the blue sea. Continue sticking on the different pieces to assemble the fish.

Step 5: Draw & cut out a rock, a starfish & some seaweek to add to your picture.

Great for a class activity, where each student can design their own fish.

Method - 3D Star:

Step 1: Draw a triangle (80x50x50 mm) & cut out 6 Glitter Blue & 6 Blue EVA Self Adhesive Foam pieces of equal sizes. Note these need to be exact to fit together.

Step 2: Before you start sticking the triangles down, draw a cross on the piece of backing card & place the triangles as shown to ensure they will fit neatly to form a star. When you have placed 6 triangles you should have half the star formed. Trim the triangles if required.

Step 3: Once you are ready to stick, remove the backing & place alternate coloured triangles on the backing card using the cross for lining up, working your way around the star.

Choose different patterns to make complex designs using shapes & colours.
